Vuelitics has significantly improved the usability of a client's existing 10 year old reporting setup.

By face-lifting and providing fluid interactivity of a modern UX, Vuelitics helps our client realize the benefits of Self-Service BI by reviving their existing setup.

Vuelitics helps a Fortune 500 client see their inventory statistics in a holistic way, right from open purchase orders to the open sales orders.

This helps them forecast demand and apply purchase suggestions while effectively monitoring inventory levels of all their warehouses.

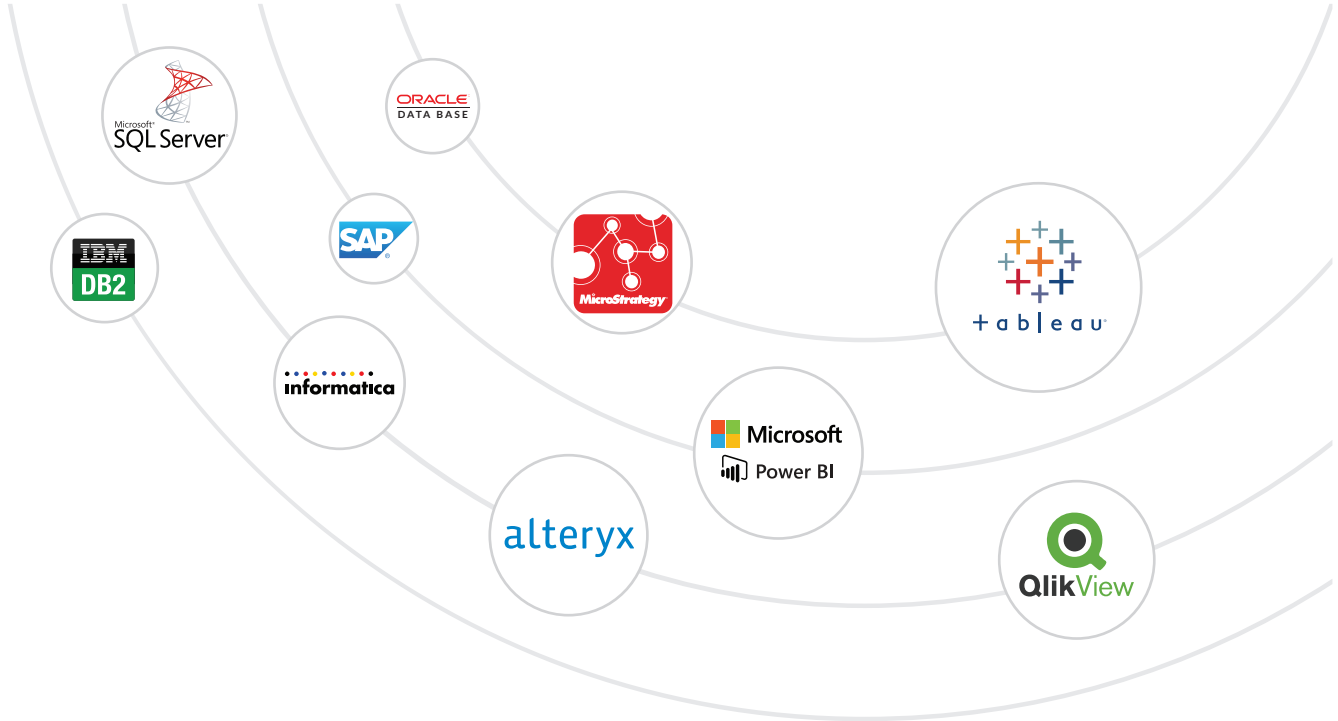

Why Vuelitics?

- > Impeccable & intuitive dashboards
- > Pure data connoisseurs
- > Instantly scalable team
- > All niche skills – one place!
- > End-to-end development
- > Thorough domain expertise
- > Experienced in mobile deployments
- > Motivated and self-organized team

With a broad spectrum of services Vuelitics works towards establishing a "single version of truth" for your entire data.

Our expert data modeling techniques allow you to view your data in multiple functional perspectives and drill down to granular details.
